Skylight Shade

# measuring instructions

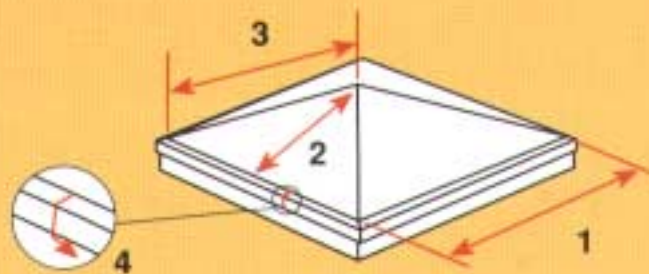

## Standard & Flat Skylights

- 1) Measure from outside edge of frame over the top center of skylight to the opposite outside edge of frame. Length and width.
- 2) Measure from outside edge of frame down to just under ( $3/8"$ ) the lip of the skylight frame.

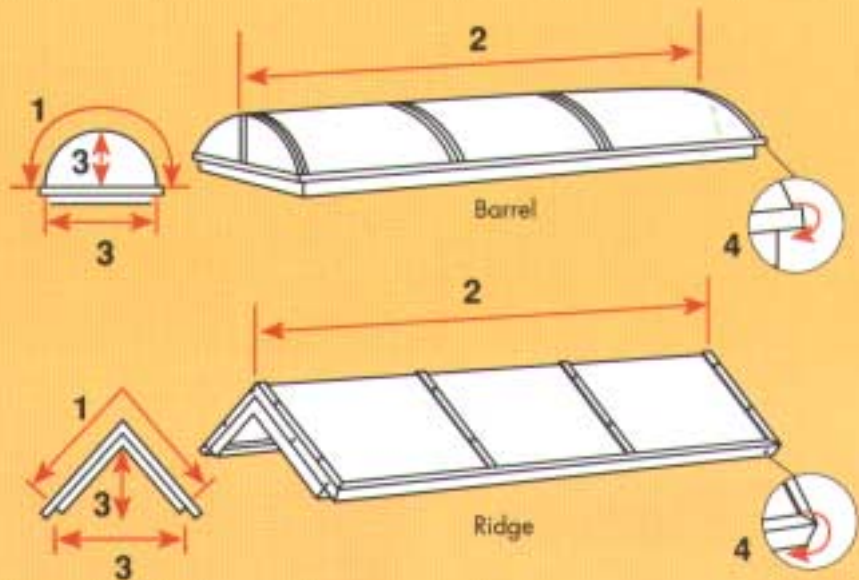

## Pyramid Skylights

- 1) Measure base of skylight (glass only).
- 2) Measure height from center of base to peak (glass only).
- 3) Measure one side of triangle from inside edge of frame to peak.
- 4) Measure from inside edge of frame down to just under the edge of lip.

## Barrel Vault & Ridge Skylights

- 1) Measure from inside edge of frame over the top of skylight to opposite inside edge of frame for the width.
- 2) Measure across the top from edge of glass to opposite side for the length.
- 3) For closed ends, measure the base width (glass only) and the height at center (glass only).
- 4) Measure from inside of frame down to just below ( $3/8"$ ) the lip of frame for loop length.

### Note:

Skylight covers will cover skylight glass only.

# save cooling energy

Enduro® Skylight Shade reduces solar heat collection and light intensity to help you save cooling energy and enjoy your skylights in comfort. Direct sunlight is so intense that even with Enduro® 80% screening, the interior light level remains more than ample. The sky is visible through the shade cover and the inside light is pleasant and natural.

Enduro® Shade is easily attached to the skylight exterior, with no holes or screws required. Each custom skylight cover comes complete with neoprene rubber tie rope, loops at 6 inch intervals, notched corners, loop and end clamps. The shade is simply placed over the skylight, then tied and secured with the rubber tie rope. In areas where solar gain is a benefit in

An unprotected skylight.

Memorial City Shopping Mall

## APPLICATIONS

### • Shopping Malls

The excitement of skylights is enhanced with Enduro® Shade, which allows the perfect amount of light while substantially reducing energy costs.

### • Art Galleries and Museums

Shaded skylights provide natural lighting for exhibits while protecting them from fading.

### • Restaurants

Skylights provide a modern and attractive look, with covers providing comfort for patrons and saving on cooling costs.

### • Industrial Facilities

Large, shaded skylights can provide a substantial portion of interior lighting without excessive heat or glare.

### • Sensitive Equipment Rooms

Shaded skylights protect computers from light and heat, while eliminating glare.

### • Residential Projects

Homeowners enjoy the ambiance of natural overhead lighting, while Enduro® Shade saves cooling costs and protects interiors from fading.

Unshaded skylights allow excessive heat and glare.

the winter, the cover can be quickly removed and stored for use the following summer.

Enduro® Skylight Shade uses a patented process to weave and heat treat vinyl-impregnated polyester yarn to protect and interlock the yarns for long life with no runs or ravel. Aluminum pigment is added during the process for maximum blockage of

ultraviolet rays. The fire retardant fabric is available in both 63% and 80% shade factors and carries a five year prorated warranty.

For flat, rectangular skylights up to 5 feet by 5 feet, an Enduro® Skylight Shade package is available in a 6 foot by 6 foot, 80% screen configuration. Skylight shades are custom made to fit pyramid, barrel vault, ridge and cluster

skylights in sizes from 20 to 200 square feet and more. Since their first introduction some twelve years ago, we have designed, fabricated and installed thousands of these energy saving, cooling shades in private homes and commercial facilities across the country.

### About the Company

Hendee Enterprises was founded in 1968 to develop products and services specialized for customer needs. In keeping with that goal, the Enduro® Fabric Awning Division was established to meet the increasing demand for awnings, illuminated canopies and signage. Later, Enduro® Products was formed to design and produce custom shade panels, windscreens and skylight shades.

By providing strong customer support and services that include design assistance, engineering, fabrication, and nationwide installation of any size project, we have become one of the largest suppliers and a leader in the industry.

↑ — CAN YOU TELL THE DIFFERENCE? — ↑

### Enduro® Skylight Shade Blocks Ultraviolet Rays and Controls Solar Heat

Ultraviolet (UV) transmittance data recently obtained from an independent testing laboratory shows that 80% screen Enduro® Shade fabric blocks 84% of total UV, while 63% screen Enduro® Shade fabric blocks 60% of total UV. Unshielded UV rays can seriously fade interior carpeting, furniture and art objects.

Solar transmittance, reflectance and absorptance tests made by the same independent laboratory show significant solar heat control properties of Enduro® Shade fabric. Detailed performance specifications are available on request.

### Warranty Policy

We are extremely proud of our products. Since only the finest materials and workmanship go into their manufacture, we expect exceptional product performance and longevity. We are committed to produce the finest product possible, deliver it on time, and stand behind its performance 100%.

If any Enduro® Skylight cover does not live up to its stated life expectancy of 5 years, we will replace it on a prorated charge basis.

We guarantee superior product quality, exemplary service, and total user satisfaction.
